

How Your Dollar is Treating 360 Degrees of Need.

EDUCATION

\$1.50 per week, or the price of a pack of gum, enables a student to participate in interactive STEM programs.

\$10 a week enables a student to attend after school and summer programs, providing a strong educational foundation necessary for success.

\$48 per week, or the savings from bringing your lunch to work daily rather than going out, could provide a young student the opportunity to attend a quality pre-school.

INCOME

\$4 per week allows a person to participate in a financial education program for a year.

\$8 per week, or the savings from refilling your water bottle rather than buying a new bottle every day for a year, could provide tax prep service to 10 people. At an average return of \$1,943, that's \$20k back in the community!

\$21 per week provides an unemployed person the training necessary to find a job and succeed in a career.

HEALTH

\$2 per week, or a soda a week for one year, could provide yearlong crisis intervention and counseling for a child who has been abused.

\$9 per week, or the cost of eating out lunch once a week, could provide one child or adult access to health care.

\$20 per week enables two children or adults to participate in programs to prevent and/or treat obesity, and the serious health problems related to obesity.

\$70 per week gives an uninsured child a health boost by providing six years of well-child visits.
